

## YOUTH HUNTING

Expose your children to the thrills and excitement of hunting by bringing them along to Omulu Safaris

Owner and hunter Espe Kriek take kids on a hunt based on his own experience of learning to hunt at the knees of his father Dawie Kriek. Few things are as precious to us as accommodating parents who bring their kids along for their first hunting trips at Omulu.

Safety is our number one priority when hunting with kids, which is why we require all children under the age of 18 to be accompanied by an adult. We provide onsite rifle practice at our onsite shooting range, and we highly recommend that they complete a hunter's safety course, although this is not required.

How old is old enough?

I would say, out of experience, 6-7 years old. When they are 10+ its perfect!

They need to be able to spend a bit of time on his feet, and be conversant enough to be able to be a bit of pal for you.

We have also seen that bringing mom along, if they are under 9, is vital.

It is a bit of a handful for daddy alone with a 7-year-old that wants to kill everything in the morning, eat everything in the afternoon, and want his mommy before he sleeps at 19:00! All that with an attention span of 2 minutes!
